Spreaders - EN

Description

A spreader is a spreading knife. This is a kitchen tool with a wider, blunt blade, ideal for evenly spreading butter, cheese, jam, or other spreads. The knife has a rounded tip, making it easy to use without damaging the food.

Here's how to use it:

1. **Hold the knife:** Hold the handle firmly so that you can use the spreading knife with control.
2. **Spread:** Use the spreading knife to evenly distribute the desired spreads over the surface. This works best with spreads that are softer. When the spreads are harder, they cannot be easily spread over the surface.
